Promesse IRAKOZE

I am experienced in web development with a passion for creating efficient, user-friendly web applications. Seeking to leverage my skills in HTML, CSS, JavaScript, and various web development frameworks to contribute to innovative projects in a dynamic team environment.

Experience

2021 - 2023

HAZA TECH Kigali,Kicukiro

UI/UX Design

Designed intuitive and visually appealing user interfaces for web applications, focusing on usability and user experience.

Conducted user research, created wireframes, and developed interactive prototypes to test and refine design concepts.

Collaborated with developers and stakeholders to ensure seamless integration of design elements into web applications.

Utilized HTML, CSS, and JavaScript to implement front-end designs, ensuring consistency across different devices and browsers.

Applied principles of responsive design to optimize user experience across various screen sizes and resolutions.

Conducted usability testing and gathered feedback to iterate and improve design solutions.

Contributed to the development of marketing materials and brand identity assets, maintaining visual consistency across all touchpoints.

2023 - 2024

TeckVilla Ltd Kigali,Kicukiro

Front End Developer

HTML/CSS: Start with the basics. Ensure you have a solid understanding of semantic HTML and CSS fundamentals, including layout techniques like Flexbox and Grid.

JavaScript (ES6+): Dive deep into JavaScript. Learn modern ES6+ features, asynchronous programming, DOM manipulation, and events handling.

Responsive Design: Master responsive web design principles. Understand media queries, fluid layouts, and frameworks like Bootstrap or Foundation.

CSS Preprocessors: Learn a CSS preprocessor like Sass or Less. Understand variables, mixins, and nesting.

Version Control: Get comfortable with Git. Learn how to manage repositories, create branches, and collaborate with others using platforms like GitHub or GitLab.

Front-end Frameworks/Libraries: Choose a popular framework like React, Angular, or Vue.js. Master its fundamentals and ecosystem.

State Management: If you're using a framework like React, learn state management libraries like Redux or MobX.

Build Tools: Familiarize yourself with build tools like Webpack or Parcel. Learn how to bundle, optimize, and automate your front-end workflow.

2024-Present

Internship in Isuzume.rw

Full Stack

Throughout the internship, seek out opportunities to work on diverse projects, collaborate with team members, and receive feedback from mentors. Stay curious, continuously learn, and don't hesitate to explore new technologies and tools.
